DETAILED ACTION

Drawings

- (1.) The drawings filed on February 17, 2004 are accepted by the examiner.

Specification

- (2.) The abstract is objected to because the word "is" on the third line should apparently be deleted. Correction and/or clarification is required.

Election Of Species

- (3.) This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figure 1; (B) Figure 2, and (C) Figure 3.

Applicants are required under 35 USC 121 to elect a single distinct disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is apparently generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP section 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.

Conclusion

(4.) Action on the merits of claims is held in abeyance pending applicants' response. It is noted however that the word "type" on the first line of claims 1-17 should perhaps be deleted in order to remove any possible ambiguity in the claims.

(5.) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard L. Chiesa whose telephone number is (571) 272-1154.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane S. Smith, can be reached at (571) 272-1166.

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1700 receptionist whose telephone number is (571) 272-1700.
